

## NEW ELEMENTS FOR 2026

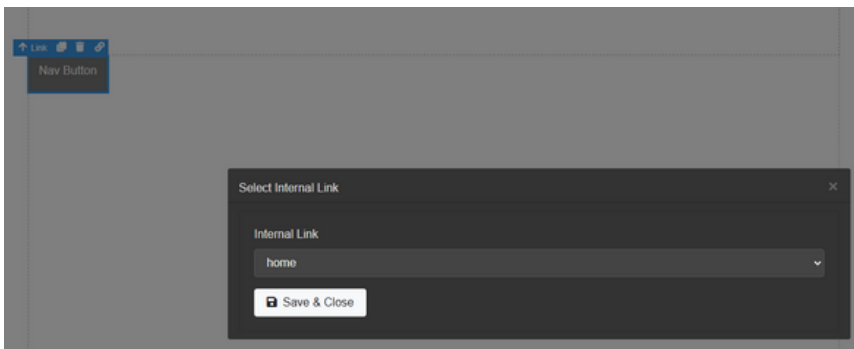

### New Order of Building Blocks

The building blocks were reordered to group similar items together. This new arrangement is designed to help you find what you need more quickly and easily.

### Built-In Assistance with Link Block Buttons

There is now built-in help for link blocks. When you drag and drop a link block onto your page, a menu will automatically appear to help you connect it to the correct page.

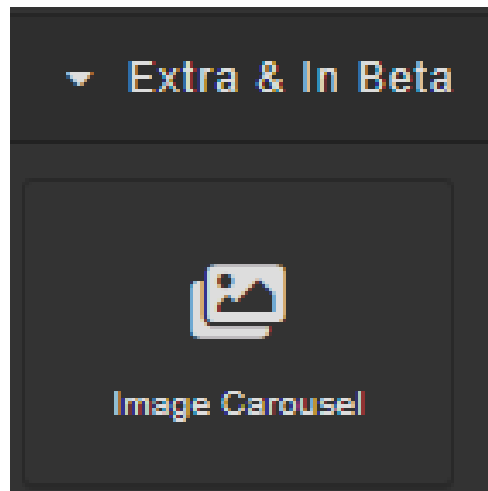

### Updated Page Templates and Site Theme Manager

There are new page templates and layout options in the **Site Theme Manager** (the palette icon in your toolbar) to help you design your site. You do not have to use these new themes or templates, but they are available if you would like some inspiration. You can still create your own custom theme using the **Site Theme Manager**.

## NEW ELEMENTS FOR 2026 (CONT.)

### Image Carousel

An updated **Image Carousel** was added. It is like a photo album - it allows you to add multiple photos for viewers to scroll through.

**Adding More Photos:** If you want to add more photo slides, click the white plus button in the top right corner of the carousel box.
